Processing Policies

Posting Order: *The order in which withdrawals and deposits are processed.*

We may determine in our discretion the order that we process and post credits, debits, and holds to your account. Typically, all credits are posted to your account first, and then debits are paid in the following order by category:

- Rejected items from the previous day
- ATM and Debit Card transactions (POS)
- Teller cashed items
- ACH items
- All other checks

Items inside each category are paid smallest to largest, with the exception of checks, they are paid in sequential check number order. The order in which transactions are paid can affect the total amount of overdraft fees incurred.

Funds Availability: *When funds deposited to your account are available.*

Funds deposited to your account are generally available the next banking day if your relationship with us is less than 180 days old. However, if your relationship with us is over 180 days old, then funds are generally available the same day. Some deposited items will be available immediately despite how long your relationship has been with us. Those are as follows:

- Cash deposits at the teller line or ATM; and
- Direct deposit; and
- POS Account Credit Transaction; and
- Wire transfers.

If we delay availability from the above referenced timeframes we will notify you at the time you make your deposit. In some situations, for example when you make a deposit at an ATM, we may notify you after your deposit is made that your funds will not be available for up to 7 business days. A "business day" is a non-holiday weekday.

Please refer to our Expedited Funds Availability Disclosure for complete details.

Determination of Rate: At our discretion, we may change the interest rate on your account.

Frequency of rate change: We may change the interest rate on your account at any time.

Compounding and Crediting: Interest will be compounded monthly and interest will be credited to your account monthly.

Effect of closing an account: If you close your account before interest is credited, you will not receive the accrued interest.

Balance Computation Method: We use the average daily balance method to calculate the interest on your account. This method applies a periodic rate to the average daily balance in the account for the period. The average daily balance is calculated by adding the principal in the account for each day of the period and dividing that figure by the number of days in the period.

Accrual of interest on noncash deposits: Interest begins to accrue no later than the business day we receive credit for the deposit of noncash items (for example, checks).
