

Overdraft Products

Woodforest National Bank (“Woodforest”) offers several overdraft solutions to assist you in managing your account while allowing you to control your cost. Paying attention to your financial needs is our top priority.

To prevent overdraft fees, we recommend that you maintain all account activity in a check register and routinely reconcile your account to the balance reported by the bank. Using our automated telephone information system, Online Banking, Online Banking Alerts, and Daily Email Notifications to monitor your account balance and account activity can assist you in managing your account. As an example, Daily Email Notifications are sent to you each morning and include detailed account balance and transaction information. Online Banking Alerts can be set to email you when your balance drops below an amount you set.

The best way to avoid overdrafts and fees is to keep track of your account balance by entering all items in your check register, reconcile your checkbook regularly and manage your finances responsibly. However, if a mistake occurs, Woodforest offers the following alternatives to cover overdrafts.

Account Sweep: This product allows you to protect your account against overdraft and insufficient item fees by transferring funds from another account when needed. By creating a link between your primary checking account to a secondary checking or savings account with our institution, any presented items that would cause an overdraft in the primary account will be paid by available funds that are automatically “swept” or transferred from the secondary account. Regardless of the number of insufficient items only one transfer fee will be assessed per day. (See our schedule of fees) If no funds are available to sweep at the time an item is presented for payment, an overdraft (OD) item fee or an insufficient (NSF) item fee may be assessed. *Certain account types have transaction limitations; please speak to a personal banker to determine whether transaction limitations apply.*

ReLi (Revolving Line of Credit) Unsecured: Upon credit approval, you could qualify for a Revolving Line of Credit that could be tied to your checking account and protect you against overdraft and insufficient item fees. Any presented items that would cause an overdraft in the account will be paid by funds that are transferred from the line of credit (up to the available limit). If no funds are available on the line at the time an item is presented for payment, an overdraft (OD) item fee or an insufficient (NSF) item fee may be assessed. This Line of Credit is a loan that you pay back with interest. Accounts with unsecured ReLi do not qualify for PrivilegePay®. Woodforest reserves the right to limit this service to one account per customer.

ReLi (Revolving Line of Credit) Secured: Upon application and deposit of good funds as collateral you could qualify for a Revolving Line of Credit, that would be tied to your checking account and protect you against overdraft and insufficient item fees. Any presented items that would cause an overdraft in the account will be paid by funds that are transferred from the line of credit (up to the available limit). If no funds are available on the line at the time an item is presented for payment, an overdraft (OD) item fee or an insufficient (NSF) item fee may be assessed. This Line of Credit is a loan that you pay back with interest. Woodforest reserves the right to limit this service to one account per customer.

ReLi Unsecured and ReLi Secured are available to both consumers and businesses. Please see a personal banker to apply.

Overdrafts: When you do not have enough available funds in your account to cover a transaction item, such as checks, ACH, and recurring bill payments, whenever possible we will return the item. One **insufficient (NSF) item fee of \$29.00** is charged to your account each time a transaction item is returned unpaid. As required by Reg. E, we will not assess OD item fees of any type against one time debit card transactions for consumer accounts unless you opt in to our overdraft services. (refer to PrivilegePay® details below).

We are under no obligation to pay items when your account has insufficient funds, even if previous transactions were paid. As a courtesy, any day that you have insufficient items presented for payment and you deposit enough funds to cover all the NSF items (and related fees) by 11:00 a. m. CT, the bank will pay the items whenever possible. Please refer to your Expedited Funds Availability Act disclosure provided to you at account opening or speak with a Retail Banker for a list of funds that have immediate availability. One **overdraft (OD) item fee of \$29.00** is charged to your account for each overdraft transaction item that is paid. No more than three (3) NSF and/or OD item fees will be charged per day regardless of the number of items presented. If an item overdraws your account \$1.00 or less we will not charge you a fee.

A transaction may still overdraw your account, and incur fees, even if the funds appeared to be available at the time you completed the transaction. Other outstanding transactions, such as ACH, checks, or debit card transactions for which no temporary hold was placed or the temporary hold has been removed, may not be reflected in your available balance on record at the bank and could be presented for payment to the bank before the subject transaction. We recommend you track all of your outstanding transactions and determine your available balance based on your records.

Order of Payment: We may determine in our discretion the order that we process and post credits, debits and holds to your account. Typically, all credits are posted to your account first, and then items are paid in the following order by category:

- Rejected items from previous day
- ATM withdrawals and Debit card transactions (POS)
- Teller cashed items
- Automated Clearing House (ACH) items
- All other checks

Items inside each category are paid smallest to largest, with the exception of checks, they are paid in sequential check number order. The order in which transactions are paid can affect the total amount of overdraft fees incurred.
